Do You Know?

PHOTINIA SERRULATA NOVA

Without a doubt the finest photinia. A broadleaf evergreen that is extremely vigorous. It's handsome leaves, huge and leathery, are tinted an amber color that deepens in the fall. Excellent for hedges or specimens—always looks most attractive with very little care.

Minimum temperature plus 5° F.

1-gal. .60 • 5-gal. \$1.85

PODOCARPUS MACROPHYLLA MAKI

Much like the old favorite macrophylla. The maki grows more compact; its leaves are smaller and a deeper green. It is especially desirable in modern planting for foliage accent—an upright growing small shrub. Belongs to the conifer family, although does not resemble them.

Minimum temperature plus 5° F.
